Annual Management Fee	0.60%
Total Expense Ratio (TER)	0.68%
Income Declaration	Accrued Daily, Paid Monthly

Who Should Invest?

The Pointbreak Institutional Money Fund is suitable for investors seeking a low risk investment that maximises income. It offers a high income yield, capital stability and good liquidity.

Investment Objective

The fund's objective is to achieve an investment return in excess of general money market instruments and funds, while ensuring a high degree of liquidity, capital preservation and below average risk. The fund invests with the four major banking groups in Namibia, the five major banking groups in South Africa, Nampost Namibia and the Namibian, - and South African Reserve Bank. Securities to be included in the portfolio consist of money market instruments, participatory interests in unit trust schemes, bank call and fixed deposits, fixed income securities, government bills and bonds, quality commercial paper and repurchase agreements.

Fund Commentary

Local annual headline inflation prints further slowed in November, reducing from 3.6% to 3.4% in Namibia and from 3.6% to 3.5% in South Africa. The South African Reserve Bank reduced its repo rate to 6.75% in November, while the Bank of Namibia left its repo rate unchanged at 6.50%, during its meeting in early December. The market currently prices in two further cuts by the SARB for 2026.

South African money market rates further reduced throughout December, with the commercial bank NCD and Treasury-Bill curves trading 5-10 bps lower. Namibians commercial bank rates were unchanged, while Treasury-Bill rates moved up by 5-15bps across the curve on the back of lower market liquidity and a deteriorating fiscal position, increasing funding need from government.

The fund maintains its constant duration approach and we expect the portfolio to outperform throughout the cutting cycle.

Asset Allocation

Weighted Average Duration - 159 days
Weighted Average Legal Maturity - 159 days

Collective Investment Schemes in Securities (unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit Trust prices are calculated on a net asset value basis, which is the total capital value invested including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Income accruals are made daily and paid out monthly. Purchase and repurchase requests may be received by the manager by 10h00 each business day. Permissible deductions may include management fees, brokerage, NAMFISA levies, auditor's fees, bank charges, trustee fees and RSC levies. A schedule of fees and charges is available on request from Ashburton Unit Trust Management Company. Commission and incentives may be paid and if so, would be included in the overall costs.
