Who Should Invest?

The Pointbreak Institutional Money Fund is suitable for investors seeking a low risk investment that maximises income. It offers a high income yield, capital stability and good liquidity.

Investment Objective

The fund's objective is to achieve an investment return in excess of general money market instruments and funds, while ensuring a high degree of liquidity, capital preservation and below average risk. The fund invests with the four major banking groups in Namibia, the five major banking groups in South Africa, Nampost Namibia and the Namibian, and South African Reserve Bank. Securities to be included in the portfolio consist of money market instruments, participatory interests in unit trust schemes, bank call and fixed deposits, fixed income securities, government bills and bonds, quality commercial paper and repurchase agreements.

Fund Commentary

Namibia's annual headline inflation stood at 3.6% in February, up from the 3.2% reported in January on the back of higher food prices. The Federal Reserve Bank and subsequently the South African Reserve Bank have kept their respective policy rates on hold throughout March. Global Reserve Banks adopted a cautious approach to the interest rate cutting cycle, to better gauge the impact of tariffs imposed by the US on global growth and inflation.

The Namibian budget for financial year 2025 / 2026 was delivered on 27 March, just a few days after the inauguration of the newly appointed cabinet. Despite a stated commitment to fiscal stability, the budget does tend towards weaker fiscal metrics, widening deficits and an increase in domestic debt issuances over the medium term.

While the Bank of Namibia maintains its negative policy spread of 75bpts below the South African Reserve Bank, the fund takes advantage of higher risk adjusted yields in the South African banking sector.

Asset Allocation

Weighted Average Duration - 152 days
Weighted Average Legal Maturity - 152 days

Collective Investment Schemes in Securities (unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit Trust prices are calculated on a net asset value basis, which is the total capital value invested including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Income accruals are made daily and paid out monthly. Purchase and repurchase requests may be received by the manager by 10h00 each business day. Permissible deductions may include management fees, brokerage, NAMFISA levies, auditor's fees, bank charges, trustee fees and RSC levies. A schedule of fees and charges is available on request from Ashburton Unit Trust Management Company. Commission and incentives may be paid and if so, would be included in the overall costs.
