Minimum Lump Sum	N\$ 100 000
Initial Fee	None
Annual Management Fee	0.60%
Total Expense Ratio (TER)	0.68%
Income Declaration	Accrued Daily, Paid Monthly

### Fund Commentary

The annual US inflation print came in at 3.0% for October (from 2.9% in September), with little tariff pass through effect. The Federal Reserve has cut the Fed Funds Rate by 25bps to 3.75%, preparing the market for a further cut of 25bps in December.

The South African MPC Committee has kept its repo rate on hold during September at 7.00%, whilst the Bank of Namibia has surprised the local market, continuing its cutting cycle by 25bps to 6.50% during October.

The Namibian and South African Money Market and Treasury Bill Curves have slightly strengthened (5-10bps) across the curve throughout October, still presenting attractive opportunity given short term inflation expectations.

The fund maintains its constant duration approach and we expect the portfolio to outperform in a cutting cycle.

### Who Should Invest?

The Pointbreak Institutional Money Fund is suitable for investors seeking a low risk investment that maximises income. It offers a high income yield, capital stability and good liquidity.

### Investment Objective

The fund's objective is to achieve an investment return in excess of general money market instruments and funds, while ensuring a high degree of liquidity, capital preservation and below average risk. The fund invests with the four major banking groups in Namibia, the five major banking groups in South Africa, Nampost Namibia and the Namibian, and South African Reserve Bank. Securities to be included in the portfolio consist of money market instruments, participatory interests in unit trust schemes, bank call and fixed deposits, fixed income securities, government bills and bonds, quality commercial paper and repurchase agreements.

Collective Investment Schemes in Securities (unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit Trust prices are calculated on a net asset value basis, which is the total capital value invested including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Income accruals are made daily and paid out monthly. Purchase and repurchase requests may be received by the manager by 10h00 each business day. Permissible deductions may include management fees, brokerage, NAMFISA levies, auditor's fees, bank charges, trustee fees and RSC levies. A schedule of fees and charges is available on request from Ashburton Unit Trust Management Company. Commission and incentives may be paid and if so, would be included in the overall costs.
